

PFT / Spirometry Billing Helper

Quick-Start card - it installs like a real app and runs with no internet

NO LOGIN - NO BROWSER - OFFLINE

1 Open it

Tap the link you were sent (or tap the file). It opens in whatever you already use - Safari, Chrome, Edge. Nothing to install to just look at it, no account, no sign-in.

2 Install it as an app (no browser, works offline)

iPhone / iPad: open the link in **Safari**, tap the **Share** button (square with an up-arrow), then **Add to Home Screen**, then **Add**.

Android: open the link in **Chrome**, tap the **menu** (three dots, top-right), then **Install app** (or **Add to Home screen**).

Windows / Mac: open the link in **Edge** or **Chrome**, click the **install icon** in the address bar (a little screen with a down-arrow), or menu, then **Install**.

After that you get an icon - tap or double-click it and the tool opens in its own window. No browser, and it keeps working with no internet.

3 Use it - three steps

1. Pick the **state** and the **payer type** (Medicare, Medicare Advantage, Medicaid, or Commercial).
2. Check off **what was performed** today. Codes that can't be billed together grey out automatically, so you only build a valid combination.
3. Press **Build my claim**. You get the exact codes, modifiers, diagnosis pointers, documentation checklist, and denial-code fixes - plus a link to that payer's policy to confirm coverage. Use **Print / Save PDF** for a clean claim sheet.

Good to know: General coding guidance, not a coverage determination or billing/legal advice. Covered diagnoses and frequency limits vary by payer and can change - the tool links you to the payer's current policy. Always confirm before you submit.
