

PulmSuite

Every breath, delivered.

PulmSuite is the cloud platform built for the MiniBox+. Every PFT, on demand, on any device, anywhere in the world. The moment the test ends, it's in your hands.

HIPAA-COMPLIANT

HITRUST-CERTIFIED

BUILT ON AWS

NO NEW HARDWARE

WHAT PULMSUITE DELIVERS

The cloud brain for the MiniBox+ you already own

Secure by design

HIPAA-compliant and HITRUST-certified, built on Amazon Web Services. Patient data protected at every step.

One patient record

Spirometry, lung volumes, and DLCO from every MiniBox+: one timeline, one place to review and sign.

Remote review & sign

The PFT happens at the site. The physician reads, comments, and signs from anywhere, on any browser.

Seamless connection

PulmSuite pairs with your MiniBox+ automatically. No installs, no updates, no technician visits.

Optional EMR integration

Pair PulmSuite with EMR integration and PFT results sync directly to your EMR's patient record via HL7.

Real time, every time

Results appear on the dashboard the moment the test is complete, not at end of day, not after an upload.

► **See it move:** ask your PulmOne rep for the interactive PulmSuite walkthrough, a live simulation of the full workflow, from the first breath to the signed report.

HOW IT WORKS

Five steps. Zero new hardware.

1

Patient is seated

No booth. No coaching for panting maneuvers.

2

MiniBox+ runs the test

Spirometry, lung volumes, DLCO, one session.

3

Result syncs

One dashboard, one centralized database, in real time.

4

Physician signs off

Reviews graphs, comments, and signs, from any browser.

5

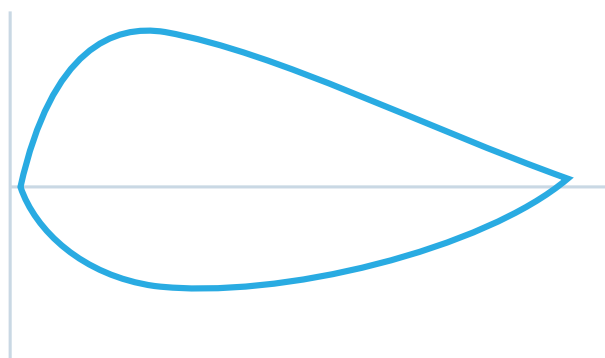

Done

The MiniBox+ you already have, upgraded.

WHAT THE CLINICIAN SEES

One dashboard. Every result.

FLOW / VOLUME

SUMMARY: VISIT SESSION

Parameter	Pre Best	%Pred	Grade
FVC	4.05	106%	A
FEV1	2.98	102%	A
FEV1/FVC	75.5	—	✓
TLC	6.12	98%	✓
DLCO	24.8	94%	✓

SECURITY & COMPLIANCE

Built for healthcare from day one

HIPAA-Compliant

Patient privacy protected end to end

HITRUST-Certified

Independently audited security framework

Built on AWS

Enterprise-grade cloud infrastructure
