Subject: End-of-Life Notification for PulmOne MiniBox® Systems

Dear Valued Customer,

PulmOne is committed to providing high-quality diagnostic solutions and long-term support to our customers. As part of our standard product lifecycle management process, we are announcing the formal **End-of-Life (EOL)** for early-generation MiniBox units first manufactured sold until 2016.

Affected Product: MiniBox

End-of-Life Date: July 1, 2026

To determine the manufacturing date of your MiniBox system, please refer to the product label located on the device. The Date of Manufacture is embedded in the serial number, the first four digits represent the year of production (e.g., 2015, 2016, etc.).

Beginning on this date, PulmOne will no longer guarantee full service, parts replacement, or software support for the affected devices. Technical assistance will remain available through the EOL period; however, after July 1, 2026, replacement components and updates will be subject to availability.

We encourage you to plan ahead for this transition. PulmOne offers upgrade and trade-in options toward the **MiniBox+** and **MiniBox** systems, which include our most recent hardware platform, enhanced measurement capabilities, and extended warranty coverage. Our team is available to discuss upgrade programs that best fit your clinical and operational needs.

For any questions regarding this notice or to review upgrade options, please contact your local PulmOne representative or reach us directly at **service@pulm-one.com** or **(844) 785-6663**.

We appreciate your continued partnership and thank you for trusting PulmOne technologies in your practice.

Sincerely,

A blue ink handwritten signature, appearing to read "Avi", written over a horizontal line.

Avi Lazar
